

GENERATION

Generators produce electricity at power plants.

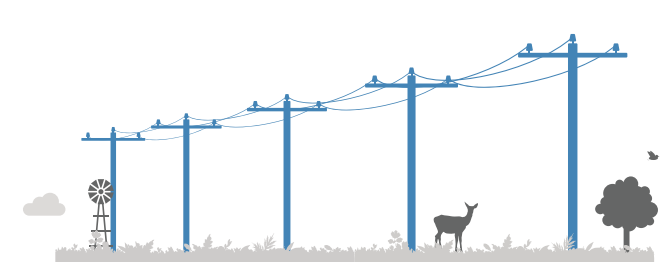

TRANSMISSION

High-voltage electricity is then carried to your community through transmission lines and equipment.

DISTRIBUTION LINES AND POLES

The distribution system brings the electricity to where you need it.

SUB-STATION

The sub-station converts the high voltage from transmission to distribution.

Distribution

YOUR SERVICE AND METER

Provides the electricity at your property so it can be used to power what matters to you.

RETAILER

Sells the electricity you consume and produces your bill

Distribution
