

FortisAlberta Project Number: CRM _____

Dear _____ (“Customer”),

Thank you for working with FortisAlberta to connect your distributed generation project (“Project”). FortisAlberta is responsible for submitting the System Access Service Request (“SASR”) for your Project for the Alberta Electric System Operator (“AESO”) cluster assessment, as the Market Participant. As part of this submission, the Customer (i.e. Generator Facility Operator) is required to confirm that it has at least 90% control of the lands/site for the Project by virtue of land ownership, a lease or an option to lease, or your submission shall not proceed.

90% Site Control Definition by AESO: “Projects following the cluster assessment process must confirm that ownership, a lease, or an option to lease is in place for at least 90% of the site required for the generation or energy storage facility at the time of application.”

LEGAL LAND DESCRIPTION AND NATURE OF INTEREST IN LAND:

1. Legal Description:

[Please provide the legal description(s) for the GFO Facility in the following format: legal subdivision or quarter section; section; township; range; and meridian. For Distributed Energy Resources (DERs), the location must be for the DER facility and not the upstream substation.]

2. Nature of Interest in Land:

- a. Do you own the lands on which the Project will be located? If yes, please provide a current copy of title evidencing your ownership from Alberta Land Titles.
- b. If you do not own the lands, do you have a valid and existing lease OR option to lease the lands on which the Project will be located? If yes:
 - i. Is the lease/option to lease in writing with the landowner?
 - ii. What is the term of lease/option to lease, including renewal/extension options (i.e. 10-year original term with 2 x 5 year options to renew).
 - iii. Is the lease/option to lease registered in Alberta Land Titles?
 - iv. A copy of the lease/option to lease agreement will be required prior to execution of the Interconnection Agreement for FortisAlberta to confirm that the Customer has complete and sufficient control of the site/lands for the Project.

Please sign below and provide any of the documents requested above to FortisAlberta.
